

# 7 INNOV RINCAGE

**DISHWASHER RINSE AID**

**ALL TYPES OF WATER**

## 7 good reasons for using 7 INNOV RINCAGE

1. **7 INNOV RINCAGE** is a dishwasher rinse aid suitable for all types of **dishwashers**.
2. 7 INNOV RINCAGE meets **ECOLABEL** requirements ; it complies with strict specifications and rigorous performance criteria.
3. **Effective** in all types of water.
4. **No marks** after drying. Dishes are left dry and sparkling.
5. **Economical**: used diluted from 0.1 to 0.5 g per litre of water.
6. **Removes** the need for long and fastidious hand-drying with a tea-towel.
7. **Contains** surfactants which break down the film of water deposited on dishes during washing.

## Particularly suitable for use in:

Public buildings

Services

Catering

Rinse aid for dishes that need to be dry and impeccably clean out of the machine.

For use in the rinse cycle of all types of industrial dishwashers for public buildings, catering and industry.

Characteristics	Instructions for use												
<p>Composition: Less than 5% anionic surfactants and phosphonate. 5% or more, but less than 15% non-ionic surfactants, Benzothiazolone.</p> <p>Appearance: clear liquid Colour: transparent orange pH neat : 2.7 Density : <math>1 \pm 0.015</math> (20°C)</p> <p>Complies with legislation on cleaning products for equipment which may come into contact with foodstuffs (Decree dated 08/09/1999 and its amendments).</p> <p><b>PROFESSIONAL USE.</b> For more information, see MSDS, which is available upon request.</p>	<p>Recommended dosage: the dosage depends on the characteristics of the site and the water hardness. Correct dosage and respect of the recommended minimum temperature allows for a decrease in energy and water consumption, thereby saving money and reducing water pollution.</p> <p>Recommended rinsing temperature: between 80°C and 90°C. To find out the HT* of your water, ask your local supplier.</p> <table border="1"> <thead> <tr> <th>Water quality</th> <th>HT</th> <th>Dosage</th> </tr> </thead> <tbody> <tr> <td>Soft water</td> <td>&lt;15°F</td> <td>0.1g/l - 0.1ml/l</td> </tr> <tr> <td>Medium water</td> <td>15-25°F</td> <td>0.2g/l - 0.2ml/l</td> </tr> <tr> <td>Hard water</td> <td>&gt;25°F</td> <td>0.3g/l - 0.3ml/l</td> </tr> </tbody> </table> <p>*HT: Hydrotimetric title Suitable for use with a dosing pump.</p> <p>For the most efficient rinse cycle possible, adhere strictly to the recommended dosage, without overdosing in order to avoid waste and to limit effluent. This product may be used in an automatic dosing system following a wash cycle with 7 INNOV LAVAGE.</p> <p>Large food particles should be rinsed off before sorting the dishes and putting them in the dishwasher tray for washing. Start the wash cycle of the dishwasher or tunnel dishwasher. Allow to dry and put away the dishes after having washed your hands.</p> <p>Suitable for use with osmosis treated and/or demineralised water.</p>	Water quality	HT	Dosage	Soft water	<15°F	0.1g/l - 0.1ml/l	Medium water	15-25°F	0.2g/l - 0.2ml/l	Hard water	>25°F	0.3g/l - 0.3ml/l
Water quality	HT	Dosage											
Soft water	<15°F	0.1g/l - 0.1ml/l											
Medium water	15-25°F	0.2g/l - 0.2ml/l											
Hard water	>25°F	0.3g/l - 0.3ml/l											
<p>Adhere strictly to the recommended quantities, using dosages that are suited to the amount of dirt and the hardness of the water. Ensure that machine is functioning properly in order to save water and energy. Use of softened water will reduce dosages whilst optimizing results. It is imperative that the user check the correct functioning of the water softener and/or the water hardness. (Contact your local water provider in order to find out the exact water hardness values). By using this product with its EU eco-label and the recommended dosages, you contribute to the reduction of water pollution and waste production. Do not exceed the recommended doses. Optimize machine loading. 100% recyclable packaging. Dispose of packaging via standard waste collection.</p>
