

AIR PUR

ODOUR ABSORBER & NEUTRALISER

7 good reasons for using AIR PUR

1. AIR PUR has been created and studied to neutralise all smells whether they are of animal, plant or industrial origin,
2. Bad smells are caused by the decomposition of organic molecules in suspension in the air. The active principle evaporates and **collides with the polluting agents** in suspension and cleanses the air.
3. The active principle modifies the **intramolecular links** of the malodorous organic molecules that it meets to create new stable and odourless complexes.
4. **AIR PUR** gets to the heart of the smells through radical and irreversible modification of their molecular structure.
5. Destroys all **types of smells**: smoke, dustbins, urine, cooking, pets, humidity, chemical and oil products ...
6. **Practical**: in sealed pot, one pot per room.
7. **2 fragrances**: marine and orange blossom.

Particularly suitable for use in

Industry

Transport

Public buildings

Hotel trade

Can be used in all types of places: the industry (adapted packaging), transport, offices, hotel trade, sports centres, dustbin premises ...

Characteristics	Instructions for use
<p>Blue solid gel (marine), White solid gel (orange blossom). pH: ~7 Density at 20°C: 0.98.</p> <p>For more information: see MSDS.</p>	<p>A pot of 300 g of AIR PUR treats a room from 25 to 30 m². Its persistence is about 4 weeks (variable according to the conditions of heat, ventilation...). For bigger volumes, use several pots.</p> <ol style="list-style-type: none"> 1- Break the tab and remove the lid. 2- Replace the lid by the plastic grid. 3- Place the pot as close as possible to the source of the bad smell, in a well-ventilated area.
