

FUITE 7

LEAK DETECTOR

EN 14291 standardCan be used upside down

7 good reasons for using **FUITE 7**

- 1. FUITE 7 locates gaseous leaks on any circuits immediately.
- 2. In compliance with the norm EN 14291 can be used at very low-temperature (up to -15°C).
- 3. **Efficient** due to its formulation containing surfactants in aqueous phase.
- 4. **Multi-function** for all types of gases except oxygen (Compressed air, hydrocarbons, CO₂, nitrogen).
- 5. Works by forming air bubbles and a very **stable** foam around the gas leak.
- 6. **Safety**: Odourless, not irritating and with neutral pH, does not corrode.
- 7. The aerosol is easy to use, safe and economical.

Particularly suitable for use in:

Construction

Industry

ransport

To detect all leaks of all types of gases or air in pipes quickly.

For 100% watertight connections during assembly or after repair and to check the installations, the joints, reservoirs, connections, bottles, gates, faucets, ratemeters, regulators...

With regard to watertightness, safety depends on the quality of work, naturally, but also on a systematic inspection of joints.

Can be used everywhere and is suitable for plumbers, fitters and refrigeration engineers, the safety inspection companies...

Characteristics **BLUE ROLL** Instructions for use **Spray** <u>Aerosol</u> Propellant gas N_2O Shake the spray can well and pulverize FUITE 7 on the materi-400ml Volume als to be checked; a thin film is enough. Depending on the Active principle importance of the leak, there will be formation of some bubbles pH: 6.0-8.0 or a Appearance Colourless clear foam FUITE 7 is provided with a multi-position valve allowing usage liauid Density at 20 °C 1.024 g/cm³ in places which are difficult to access. For more information, see MSDS
