

SX99

DEGREASING FOR ELECTRICAL AND ELECTRONIC EQUIPMENT

7 good reasons for using SX99

1. SX99 is a specifically designed degreaser for **electrical and electronic** equipment.
2. Contains a non-flammable chlorofluorocarbonated solvent. **No risk** labelling.
3. Efficient: evaporates **very quickly**. Leaves **no residue** after evaporation.
4. **Compatible** with most metallic, plastic or elastomer surfaces.
5. **Compatible** with oxidants, oxidising substances, EPDM and nitrile.
6. Can be used while equipment is **switched on**.
7. SX 99 has **no effect** on the ozone layer and has a negligible greenhouse gas effect (GWP =6.5).

Particularly suitable for use in

Industry

Constructions

Public buildings

Eliminates all types of pollution of electrical and electronic equipment, precision mechanics, electric clock mechanisms, measuring equipment, printed circuits, connections, fuse boxes, switches, busbars cell insulators.

Low-voltage equipment, telephones, telecommunications, as well as any electrical equipment, disconnecting switches, circuit breakers, rheostats, coils, alternators.

Equipment can be cleaned while switched on.

Characteristics	Instructions for use
<p>Non-flammable propellant gas: 1234ZE Dielectric resistance (of chlorofluorocarbonated solvent): 18 kV for a deviation of one inch Vapor pressure (of chlorofluorocarbonated solvent): 126 kPa Kauri-Butanol value (of chlorofluorocarbonated solvent): 25 Net volume 650 ml Net weight 300 g</p> <p>For more information, see MSDS.</p>	<p><u>Does not require powering down of devices for cleaning.</u> Test the product on specific materials before use. Spray parts to be cleaned from a distance of 20cm (Do not spray too close). Repeat the operation until unwanted elements have been completely removed.</p> <p>Do not spray on electric arcs, flames or any hot material.</p>
