

# VULCA 7

## AUTO-VULCANIZING STRIP FOR MAINTENANCE

COLD

### 7 good reasons for using VULCA 7

1. VULCA 7 is **fast and easy** to use, auto-mixes, not need for adhesives, heat or chemical products.
2. Creates an immediate **cold cure** after stretching.
3. Pressure resistance up to **12 bars**.
4. Electrical insulator up to **8,000 Volts**.
5. Excellent **resistance** to U.Vs., Ozone, ageing and water.
6. Extreme **flexibility** which allows the product to be wrapped around various diametres in the same covering operation (a pipe and its joins for example).
7. **Seals**, isolates and protects against mould and corrosion.

### Particularly suitable for use in

Construction

Industry

Transport

Hospitals

Insulation and protection of connections and electric cables.

Protection against the corrosion of metallic pipes.

Temporary repair of garden hoses.

Insulation of electric connections.

Increases any water resistance on electrical appliances.

To repair leaks in water heating systems.

To repair pipes in air-conditioning systems.

Allows you repair low pressure leaks without stopping the liquid in the circuit. Easy application on pipes which are difficult to access, such as those which are along walls and/or near the floor. Dirt will not stick to the ribbon whilst wrapping around the pipe.

Characteristics	Instructions for use
<p>Appearance: strip 10 m length X 19 mm width.            Temperature resistance: from -65 °C to 260 °C.            Dielectric strength: 8 000 V for a 1 mm thickness.            Colour: black            Packaging of 3 trips.</p>	<p>Clean the surface. Remove the protective film. Stretch the strip until to reduced it to 2/3 of the original width and wrap it around the pipe or the cable by covering half of the previous strip. If it is for a leak, begin some cm before the leak and finish some cm after. The cold cure begins and finishes after 2 hours.</p>
